

Azure Cloud Active Directory Setup and User Management

I created a virtual network (VNet) with two virtual machines (VMs). Afterward, I set up an Active Directory on Windows Server 2022 Datacenter Azure Edition and accessed it remotely using the Windows Remote Desktop application.

The screenshot displays the Azure Resource Manager interface for the 'University of Dallas' subscription. The left sidebar contains navigation options such as 'All resources', 'Favorite resources', 'Recent resources', 'Resource groups', 'Tags', 'Organization', 'Service groups', 'Management groups', 'Subscriptions', 'Tools', 'Deployments', and 'Help'. The main area shows a table of resources with columns for Name, Type, Resource Group, Location, and Subscription. The resources listed include Client01, Client01-ip, Client01-nsg, client01716, Client01_OsDisk_1_27690f9520e432992addf006a234f84, DC01, DC01-ip, DC01-nsg, dc01784, DC01_OsDisk_1_b7206af989e44a2a9769a8e9396f38cf, DC01nsg877, DC02-ip, DC02-nsg, NetworkWatcher_southeastasia, vnet-southeastasia-1, vnet-southeastasia-2, and vnet-southeastasia-3. The bottom of the page indicates 'Showing 1 - 17 of 18. Display count: auto' and includes a 'Give feedback' link.
