

# Security Departments

In tiny companies, the IT department takes the role of securing the company. Small to medium-sized companies may have a generic "Information Security" team that does all sorts of tasks. For this room, we will focus on bigger companies with a CISO overseeing multiple security teams, each handling a specific task. For example:

- **Red Team:** Offensive security experts, pentesters, or ethical hackers who look for security issues
- **GRC Team:** Specialists managing policies and ensuring compliance with regulations like [PCI DSS](#)
- **Blue Team:** Defensive security experts like [SOC](#) analysts, engineers, or incident responders

Answer the questions below

---

Which senior role typically makes key cyber security decisions?

CISO

✓ Correct Answer

What is the common name for roles like SOC analysts and engineers?

Blue Team

✓ Correct Answer
