Task 1 ✓ Introduction

During or after alert triage, L1 analysts may be uncertain about how to classify the alert, requiring senior support or information from the system owner. Also, L1 may deal with real cyberattacks and breaches that need immediate attention and remediation actions. This room covers these cases by introducing three new terms: alert reporting, escalation, and communication.

Learning Objectives

- Understand the need for SOC alert reporting and escalation
- Learn how to write alert comments or case reports properly
- Explore escalation methods and communication best practices
- Apply the knowledge to triage alerts in a simulated environment
- Feel more confident in SOC Simulator and during SAL1 certification

- Complete the preceding SOC L1 Alert Triage room
