

understand yourself. The procedures for requesting support may differ, but the flow generally looks like this:

SOC Dashboard Escalation

1. Move the alert to **In Progress** status and do the analysis
2. Write an alert report and set your **verdict**, such as True Positive
3. If escalation is required, assign the alert **to your L2** on shift
4. L2 will receive a notification and start from your alert report

Answer the questions below

Who is your current L2 in the SOC dashboard (opens in new tab) that you can assign (escalate) the alerts to?
